

# MEETING XIV

WE'RE MAKING AN APP // BUTTONS

# THE PLAN & IDEAS

- we want to make a application that can control a drone, using the skills we've learned
- we'll also educate you all on any additional skills that we need
- what do you think an app that controls a drone should be able to do?

# WRITING BUTTONS IN HTML WITH JS REACTIONS

```
<button onclick="post()">post</button>
```

```
<script>  
    function post() {  
        //do stuff  
    }  
</script>
```
